

# INDEX

- Adsorption in soils, 192-194
- Alicante, Marcos M. (paper), The Viability of the Nodule Bacteria of Legumes Outside of the Plant: I, II, 27-52.
- (paper), The Viability of the Nodule Bacteria of Legumes Outside of the Plant: III, IV, V, 93-114
- Alkali Soils—
- Contribution to the Theory of the Origin of (paper), Alexius A. J. de'Sigmond, 455-479
- Alumina, iron and silica, ratio of, in certain heavy clays, 349-359
- Aluminum chlorides, effect of, on legume bacteria, 108
- Amino nitrogen in soils and plants, 260, 265
- Ammonia—
- effect of, on cellulose decomposition, 116-126
- in soils and plants, 263, 267
- Ammonification—
- effect of sulfur on, 248, 251
- tests, measuring rate of urea decomposition by, 65-66
- Ammonium sulfate, nitrification of, in presence of lime, 446-449
- Anderson, J. Arlington (paper), The Influence of Available Nitrogen on the Fermentation of Cellulose in the Soil, 115-126
- Arndt, C. H. (paper), The Salt Requirement of *Lupinus Albus*, 1-6
- Austin, R. H., Spurway, C. H., and (paper), Some Residual Effects of Neutral Salt Treatments on the Soil Reaction, 71-74
- Azotobacter chroococcum*—
- the endurance of other legume bacteria in the presence of, 47-50
- thermal death point of, 100-101
- Bacteria, pea, the endurance of, in the presence of *B. prodigiosus*, *B. capsulatus*, *B. subtilis*, *B. mesentericus*, pink yeast and molds, 47-49
- Bacterial Flora,—
- A Comparative Study of the, of Wind-blown Soil: I. Arroyo Bank Soil, Tucson, Arizona (paper), Laetitia Snow, 143-165
- Bacterial types, the, occurring in frozen soil, 225-231
- Barnette, R. Marlin (paper), Synthetic Calcium Silicates as a Source of Agricultural Lime: II. A Comparison of their Influence with that of other Forms of Lime upon Certain Microbiological Activities in the Soil, 443-453
- Base exchange—
- Colloidal behavior of soils and, 181-195
- Baver, L. D. (paper), The Use of the Quinhydrone Electrode for Measuring the Hydrogen-Ion Concentration of Soils, 167-179
- Bennett, H. H. (paper), Some Comparisons of the Properties of Humid-Tropical and Humid-Temperate American Soils; with Special Reference to Indicated Relations between Chemical Composition and Physical Properties, 349-375
- Bouyoucos, George John (paper), Do Colloids Exist as a Coating around the Soil Grains? 481-487
- Brown, S. M., Kelley, W. P. and (paper), Ion Exchange in Relation to Soil Acidity, 289-302.
- Calcium—
- determination of, in soil solution, 428, 431
- effect of sulfur oxidation on water-soluble, in soils, 493
- Calcium and Magnesium—
- Influence of Form, Soil-Zone, and Fineness of Lime and Magnesia Incorporations Upon Outgo of (paper), W. H. MacIntire, 377-391
- Calcium carbonate—
- effect of, in soil on thermal death point of nodule bacteria, 103-104
- effect of, on various nodule bacteria, 105-107
- influence of, on solubility of phosphates, 435
- influence of, on viability of nodule bacteria, 44-46

- Calcium chloride, effect of, on soil reaction, 72-74
- Calcium phosphate (tertiary)—  
availability of phosphates from, 437-439  
effect of, on various nodule bacteria, 105-108  
effect of, on viability of nodule bacteria, 44-46  
solubility of, as influenced by lime, 435
- Calcium Silicates—  
Synthetic, as a Source of Agricultural Lime: II. A. comparison of their influence with that of Other Forms of Lime upon Certain Microbiological Activities in the Soil (paper), R. Marlin Barnette, 443-453
- Capillary forces versus centrifugal forces in determining the soil moisture content, 415-423
- Carbon-nitrogen ratio, early knowledge on the subject of the, 115
- Cecil clay, properties of, 373
- Cellulose—  
the influence of available nitrogen on the fermentation of, in the soil, 115-126
- Coe, Dana G. (paper), Effects of Various Methods of applying Fertilizers on Crops and on Certain Soil Conditions, 7-21  
(paper), The Effects of Various Methods of Applying Fertilizers on Crop Yields, 127-141.
- Colloids—  
Do, Exist as a Coating around the Soil Grains? (paper), George John Bouyoucos, 481-487  
role of soil, in soil fertility, 181-182
- Conductivity determinations of soil solution, 427-428.
- Deuber, C. G. (paper), Potassium Ferrocyanide and Ferric Ferrocyanide as Sources of Iron for Plants, 23-26
- Dialysis, preparation of soil extracts by, 426-427
- Domontovitch, M. K., Prianishnikov, D. N., and (paper), The Problem of a Proper Nutrient Medium, 327-348
- Donnan equilibrium, an application of the theory of, to soils, 439
- Duley, F. L. and Jones, M. M., (paper), Effects of Soil Treatments Upon the Draft of Plows, 277-288
- Duley, F. L., (paper), The Loss of Soluble Salts in Runoff Water, 401-409
- Erosion, relation of, to loss of soluble salts, 401-409
- Fertilizers—  
effect of, on replacement of cations in soils, 188  
Effects of Various Methods of Applying, on Crops and on Certain Soil Conditions (paper), Dana G. Coe, 7-21  
The Effects of Various Methods of Applying, on Crop Yields, (paper), Dana G. Coe, 127-141
- Fife, J. M., (paper), The Effect of Sulfur on the Microflora of the Soil, 245-252
- Flax as influenced by nitrogenous fertilizers, 303-306
- Garbage tankage, the availability of nitrogen in, and in urea in comparison with standard materials, 59-69
- Harper, Horace J., Thomas, Royle, P., and (paper), The Use of Oat Straw in a System of Soil Fertility, 393-400.
- Harris, Karl, Moyer, Thomas, D., and (paper), The Moisture Equivalent of Soils, 411-424.
- Heat of wetting, study of colloids by the method of, 481-482
- Humus, presence of, in alkali soils, 462-466
- Hydrochloric acid, effect of, on legume bacteria, 108
- Hydrogen-ion concentration—  
effect of plant growth on reaction of culture solution, 4-5  
its effect on plant growth, 24-25  
of soil water extracts, 184-185  
the influence of, on legume bacteria, 108  
The Use of the Quinhydrone Electrode for Measuring the, of Soils, (paper), L. D. Baver, 167-179  
variations in, in various soil horizons, 72-74
- Iron—  
Potassium Ferrocyanide and Ferric Ferrocyanide as Sources of, for Plants, (paper), C. G. Deuber, 23-26
- Joffe, J. S., and McLean, H. C., (paper), Colloidal Behavior of Soils and Soil Fertility: II. The Soil Complex Capable of Base Exchange and Soil Acidity, 181-195
- Johnston, William W., (paper), The Production and Use of Sulfate in Humid and

- Arid Soils as Affected by Cropping and Sulfur Treatment, 233-244
- Jones, M. M., Duley, F. L., and (paper), Effects of Soil Treatments Upon the Draft of Plows, 277-288
- Kelley, W. P. and Brown, S. M., (paper), Ion Exchange in Relation to Soil Acidity, 289-302.
- Krassovsky, Irene (paper), Physiological Activity of the Seminal and Nodal Roots of Crop Plants, 307-325
- Legume bacteria, influence of various acids on, 108
- Legume Nitrogen—  
The Form of, Assimilated by Non-legumes when Grown in Association (paper), James Henry Stallings, 253-276
- Lime—  
calcium silicate as a source of, 443-451  
factors influencing the effects of, additions, 377  
influence of, upon bacterial numbers of soil, 443-449  
influence of, upon sulfate formation, 449-451  
influence of various forms of, on nitrate formation, 445-451  
the influence of, and phosphatic fertilizers on the phosphorus content of the soil solution and of soil extracts, 425-441
- Lochhead, A. G., (paper), The Bacterial Types Occurring in Frozen Soil, 225-231
- Lupinus Albus—  
the salt requirements of, 1-6
- MacIntire, W. H. (paper), Influence of Form, Soil-Zone, and Fineness of Lime and Magnesia Incorporations upon Outgo of Calcium and Magnesium, 377-391
- McLean, H. C., Joffe, J. S. and (paper), Colloidal Behavior of Soils and Soil Fertility: II. The Soil Complex Capable of Base Exchange and Soil Acidity, 181-195
- Magnesium chloride, effect of, on soil reaction, 72-74
- Manure—  
effect of, on draft of plow, 278
- Moisture,—  
A Study of Some of the Factors Affecting the Supply of, to Crops in Sandy Soils, (paper), H. W. Stewart, 197-223  
equivalent of soils, 411-424
- Moyer, Thomas D., and Harris, Karl, (paper), The Moisture Equivalent of Soils, 411-424
- Nitrates—  
accumulation of, in Carrington loan when straw was applied, 396  
effect of, on cellulose decomposition, 116-126  
influence of various forms of lime on formation of, 445-449  
in soils, tops and roots of plants, 259, 264
- Nitric acid—  
effect of, on legume bacteria, 108
- Nitrification—  
as affected by cellulose, 121-124  
influence of sulfur on, 249, 251  
of  $(\text{NH}_4)_2\text{SO}_4$  in presence of lime, 446
- Nitrites in soil and plants, 263
- Nitrogen—  
The Availability of, in Garbage Tankage and in Urea in Comparison with Standard Materials (paper), A. L. Prince and H. W. Winsor, 59-69  
The Effect of Varying the, Supply on the Ratios between the Tops and Roots in Flax (paper), Thomas W. Turner, 303-306  
The Influence of Available, on the Fermentation of Cellulose in the Soil, (paper), J. Arlington Anderson, 115-126.
- Nodal roots, physiological activity of, 307-321
- Nodule Bacteria—  
Review of literature on viability of, 27-28  
The Viability of the, of Legumes, Outside of the Plant: I, II, (paper), Marcos M. Alicante, 27-52  
The Viability of the, of Legumes Outside of the Plant: III, IV, V, (paper) Marcos Mondejar Alicante, 93-114
- Nutrient medium—  
The Problem of a Proper, (paper), D. N. Prianishnikov, and M. K. Domontovitch, 327-348
- Organic matter, method for determining, in soil, 460-461
- Parker, F. W., and Tidmore, J. W. (paper), The influence of Lime and Phosphatic Fertilizers on the Phosphorus Content of the Soil Solution and of Soil Extracts, 425-441
- Phosphatic fertilizers—  
the influence of lime and, on the phos-

- phorus content of the soil solution and of soil extracts, 425-444
- Phosphorus—  
determination of, in soil solution, 428-435
- Plant extract, method of obtaining, 256
- Plowing, methods of determining draft in, 277
- Potassium chloride, effect of, on soil reaction, 72-74
- Powell, E. B., (paper), A New Soil Core Sampler, 53-57
- Prianishnikov, D. N., and Domontovitch, M. K., (paper), The Problem of a Proper Nutrient Medium, 327-348
- Prince, A. L., and Winsor, H. W., (paper), The Availability of Nitrogen in Garbage Tankage and in Urea in Comparison with Standard Materials, 59-69
- Protozoa, development of, in frozen soils, 226
- Quinhydrone electrode, the use of the, for measuring the hydrogen-ion concentration of soils, 169-179
- Radiobacter, the endurance of cowpeas, soybean and sweet clover organisms in the presence of, 47-48
- Radicola—  
effect of oxygen supply on the growth of, 94-96  
effect of shaking on, 96  
thermal death point of, 100-101
- Roots—  
Physiological Activity of the Seminal and Nodal, of Crop Plants, (paper), Irene Krassovsky, 307-325
- Salts—  
the loss of soluble, in runoff water, 401-409
- Seminal roots, physiological activity of, 307-321
- Sigmond, Alexis A. J. de', (paper), Contribution to the Theory of the Origin of Alkali Soils, 455-479
- Snow, Laetitia M., (paper), A Comparative Study of the Bacterial Flora of Wind-blown Soil: I. Arroyo Bank Soil, Tucson, Arizona, 143-165
- Sodium—  
carbonate, rôle of, in alkali soils, 467  
chloride, effect of, on soil reaction, 72-74
- Soil—  
a comparative study of the bacterial flora of windblown: I. Arroyo Bank Soil, Tucson, Arizona, 143-165
- A New, Core Sampler, (paper), E. B. Powell, 53-57
- a study of the, complex capable of base exchange, 181-194
- Effects of, Treatments upon the Draft of Plows (paper), F. L. Duley and M. M. Jones, 277-288
- fluctuation of, horizons, 458
- grains, presence of colloid coatings around, 481-486
- influence of lime upon microbiological activities in the, 443-452
- method of determining organic matter in, 460-461
- The Bacterial Types Occurring in Frozen, (paper), A. G. Lochhead, 225-231
- the effect of sulfur on the microflora of, 245-252
- Soil Acidity—  
effect of, upon the infecting power of *B. radicola*, 104-105
- Ion Exchange in Relation to, (paper), W. P. Kelley and S. M. Brown, 289-302
- problem of, 182-183
- quantitative determination of, 186
- the soil complex capable of base exchange and, 181-195
- Soil Conditions—  
effects of various methods of applying fertilizers on crops and on certain, 7-21
- peculiar form of, in Central America, 359
- Soil Fertility—  
Colloidal Behavior of Soils and, II. The Soil Complex Capable of Base Exchange and Soil Acidity, (paper), J. S. Joffe, and H. C. McLean, 181-195.
- The Use of Oat Straw in a System of, (paper), Royal P. Thomas and Horace J. Harper, 393-400
- Soil horizons, variation in reaction in different, 72-74
- Soil infusion, effect of, on survival of nodule bacteria, 30-38
- Soil moisture, effect of, on draft of plow, 282-287
- Soil Reaction—  
Some Residual Effects of Neutral Salt Treatments on the, (paper), C. H. Spurway and R. H. Austin, 71-74
- variation in, when water extract or neutral salt solution extract is used, 184

- Salt Requirements—**  
 The, of *Lupinus Albus*, (paper), C. H. Arndt, 1-6
- Soil Solution—**  
 calcium content of, 428-434  
 conductivity determinations on, 427-428  
 dialysis of, 426-427  
 phosphorus content of, 428-439  
 The Influence of Lime and Phosphatic Fertilizers on the Phosphorus Content of the, and of Soil Extracts (paper), F. W. Parker and J. W. Tidmore, 425-441
- Soils—**  
 adsorption phenomena in, 192-194  
 colloidal behavior of, and soil fertility, 181-195  
 factors, affecting the moisture supply in sandy, 197-217  
 properties of Central American, 351-359  
 Some Comparisons of the Properties of Humid-Tropical and Humid Temperate American; With Special Reference to Indicated Relations between Chemical Composition and Physical Properties (paper), H. H. Bennett, 349-375  
 The Moisture Equivalent of, (paper), Moyer D. Thomas, and Karl Harris, 411-424  
 use of different grades of sulfur in, 489-493
- Spurway, C. H., and Austin, R. H. (paper), Some Residual Effects of Neutral Salt Treatments on the Soil Reaction, 71-74
- Stallings, James Henry (paper), the Form of Legume Nitrogen Assimilated by Non-legumes when Grown in Association, 253-276
- Stephenson, R. E., (paper), Relation of Fineness of Grinding to Rate of Sulfur Oxidation in Soils, 489-494
- Stewart, H. W., (paper), A Study of Some of the Factors Affecting the Supply of Moisture to Crops in Sandy Soils, 197-223
- Straw, the use of, in a system of soil fertility, 393-399
- Sulfate—**  
 The Production and Use of, in Humid and Arid Soils as Affected by Cropping and Sulfur Treatments, (paper), William W. Johnston, 233-244
- Sulfur—**  
 effect of, applications to soil and sulfur content of crops, 235-238  
 review of literature on, in agriculture, 233  
 The Effect of, on the Microflora of the Soil, (paper), J. M. Fife, 245-252  
 use of different grades of fineness of, in soils, 489-493  
 Sulfuric acid, effect of, on legume bacteria, 108
- Sulfur Oxidation—**  
 Relation of Fineness of Grinding to Rate of, in Soils, (paper), R. E. Stephenson, 489-494
- Sulfur treatments, the production and use of sulfate in humid and arid soils as affected by cropping and, 233-244
- Thomas, Royle P., and Harper, Horace J. (paper), The Use of Oat Straw in a System of Soil Fertility, 393-400
- Tidmore, J. W., Parker, F. W., and (paper), The Influence of Lime and Phosphatic Fertilizers on the Phosphorus Content of the Soil Solution and of Soil Extracts, 425-441
- Transpiration coefficient, calculation of, 76
- Tulaikov, N. M., (paper), The Utilization of Water by Plants Under Field and Greenhouse Conditions, 75-91
- Turner, Thomas W. (paper), The Effect of Varying the Nitrogen Supply on the Ratios between the Tops and Roots in Flax, 303-306
- Urea—**  
 the availability of nitrogen in garbage tankage and in, in comparison with standard material, 59-69
- Water—**  
 The Loss of Soluble Salts in Runoff, (paper), F. L. Duley, 401-409  
 The Utilization of, by Plants Under Field and Greenhouse, Conditions, (paper), N. M. Tulaikov, 75-91
- Weathering, peculiar types of, 359-361
- Winsor, H. W., Prince, A. L. and (paper), The Availability of Nitrogen in Garbage Tankage and in Urea in Comparison with Standard Materials, 59-69
- Zeolites in soils, 181-182, 466-467
